X

Arrow function → comes from outside

normal function → depends on how it called

this ≠ variable

coercion
type conversion
Implicit
(ಸ್ವಯಂ)
Explicit
(manually)

operator → + → agar koi bhi ek operand string hua toh string concatination hoga

Js remaining operands ko bhi string mai convert kar degi

/, *, - → Js sare operands ko number mai convert karegi (agar koi number nhi nai toh) and output degi.

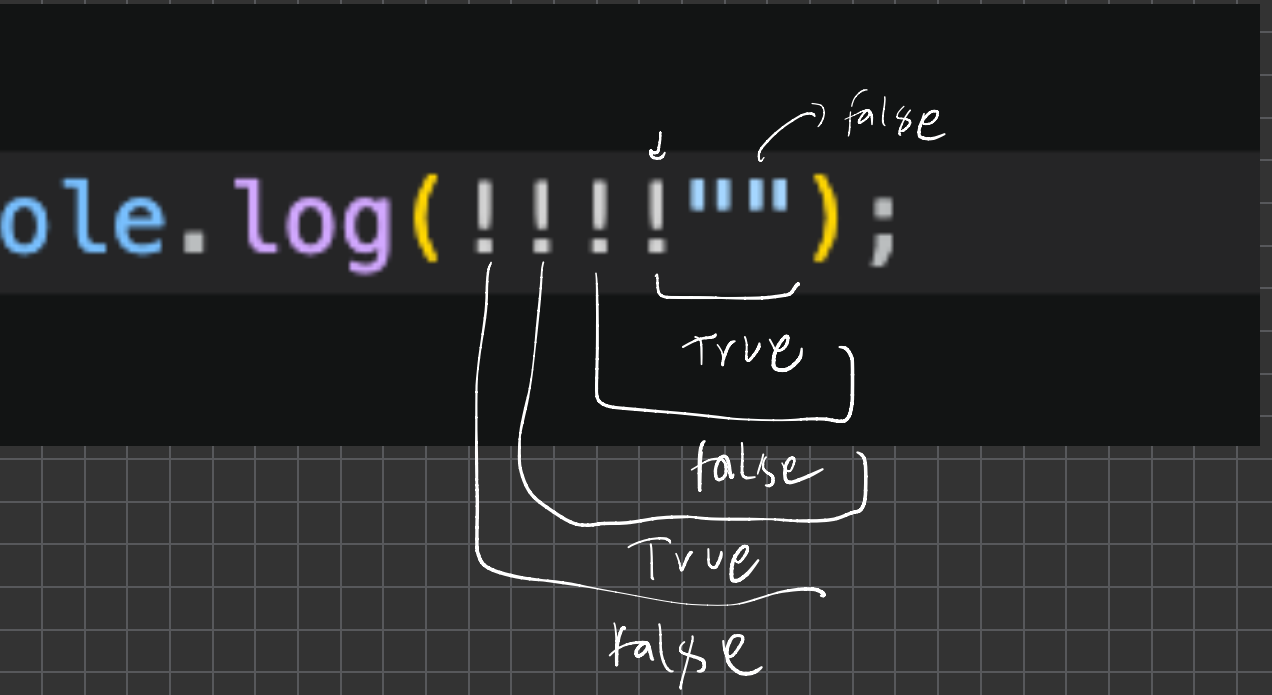

Falsy

false, 0, "", undefined, null, NaN

(empty string)

[ ] → Truthy

{ }

ole.log(!!!!"");
