Box Model

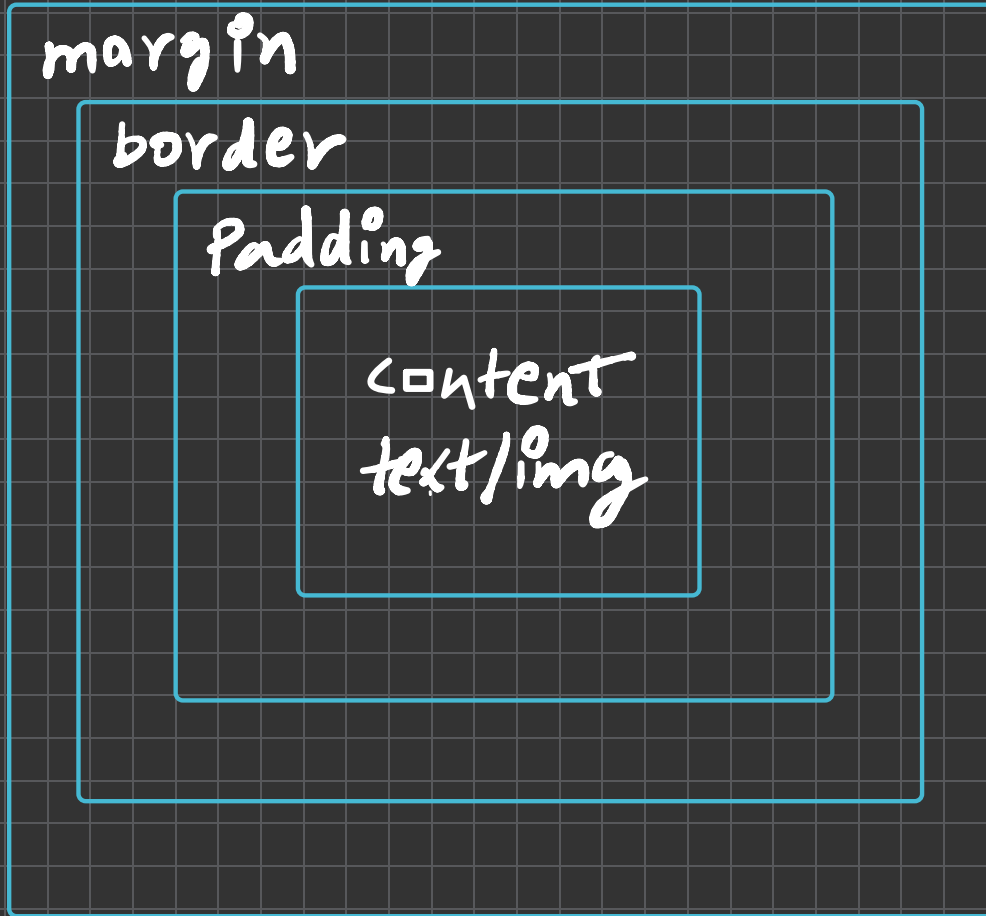

Rectangular
Shape

margin

border

padding

content
text/img

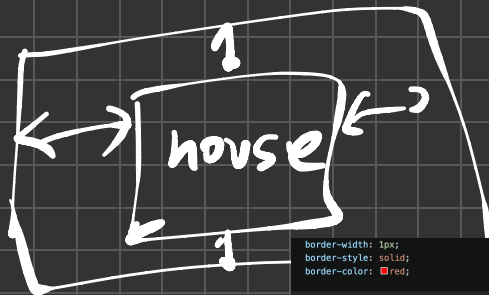

Content: The innermost layer where text, images, or media are displayed. Its size is controlled by the width and height properties.

Padding: The transparent space inside the element, between the content and the border. It creates "breathing room" so content doesn't touch the edges.

Border: A visible line or frame that wraps around the content and padding.

Margin: The outermost, transparent space that separates the element from other surrounding or parent elements

border

```
border-width: 1px;  
border-style: solid;  
border-color: red;
```

```
border : 2px solid navy;
```

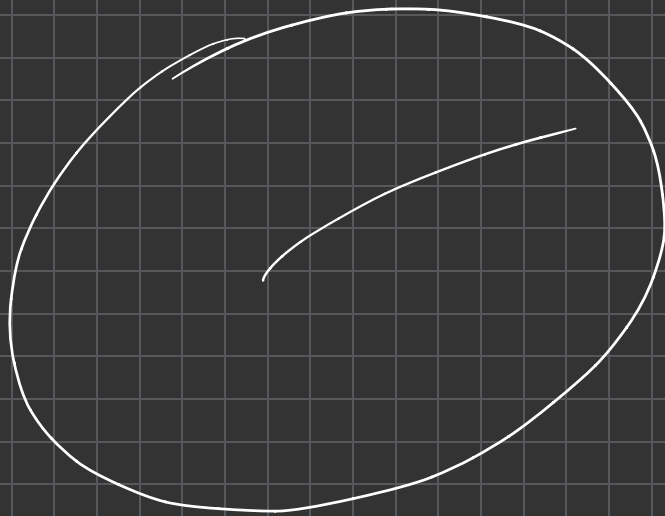

```
border-width: 1px;  
border-style: solid;  
border-color: red;
```

→ long

```
border : 2px solid navy;
```

→ shorthand
